

SOLAR STIK®

Mast Top Adapter

20 in – Item # 09-1000000

26 in – Item # 09-1000015

Overview

The Mast Top Adapter can be added to a Marine 100 System to provide extra height for mounting a wind turbine, satellite dome, radar, or other device that needs additional vertical clearance. The Mast Top Adapter is available in 20- or 26-inch lengths and converts the existing 1-inch top of the System's mast to a standard 1.5-inch pipe size. The Mast Top Adapter is not pre-wired for wind turbine installation. Refer to the Marine Wind Turbine Installation Kit for a pre-wired version of the Mast Top Adapter.

Construction

Body	Cast aluminum
