

SOLAR STIK®

24VDC Inter-Connect Cable

5 ft - Item # 13-0000032

The Strongest Link

Inter-Connect cables provide a simple, safe, and secure solution for connecting components (Expander Paks, PRO-Verters, etc.) in a system. The Inter-Connect plugs on each end are polarized to ensure proper orientation. The spin-lock mechanism provides a secure connection to the component. Plugs specific for 24 VDC systems ensure that only compatible components can be integrated into a system.

The Tie That Binds

The Inter-Connect circuit allows all of the components operating in a hybrid system to coordinate their functions, providing seamless operation for the application. Voltage is communicated through the common bus to all points in the network, enabling features such as generator autostart/stop and maximum photovoltaic power generation when available.

General

Connector	Deltran spin-lock polarized
Voltage	24 VDC
Warranty	1-year materials and workmanship

5-foot Inter-Connect Cable

Gauge wire	2 AWG
Continuous Current Capacity	200 A maximum
Dimensions	Length: 60 in (152.4 cm)
Weight	2.1 lb (1.0 kg)

Why Solar Stik?

- Modular, Scalable Architecture
- Field-proven, Rugged Designs
- Experienced Team
- 24/7 Tech Support
