

SOLAR STIK®

24VDC Inter-Connect Strip 7

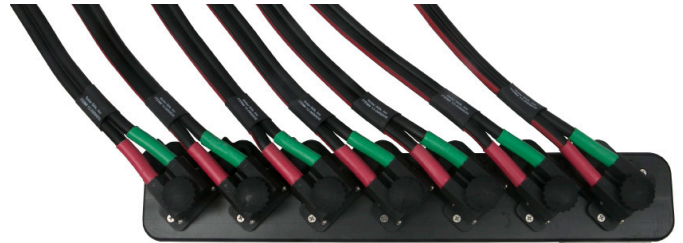

Item # 13-1000160

Plug & Play

The 24VDC Inter-Connect Strip 7 is a fundamental tool for expanding the architecture of a Solar Stik System. It is a common bus for connecting up to seven circuits.

The Tie That Binds

The Inter-Connect circuit allows all of the components operating in a hybrid system to coordinate their functions, providing seamless operation for the application. Voltage is communicated through the common bus to all points in the network, enabling features such as generator autostart/stop and maximum photovoltaic power generation when available.
